

East Tennessee
Gastroenterology
PLLC

For Our Diabetic Patients:

- ▶ It is very important to check your blood sugar levels through out the day prior to your procedure.
- ▶ Please drink plenty of clear liquids (8 oz per hour) up to 8 hours prior to your procedure

Morning Procedure

If you are Insulin dependent:

- On the day prior to your procedure take your Morning dose of Insulin as usual. **DO NOT TAKE YOUR EVENING DOSE**
- On the day of your procedure do not take your morning dose.

If you take Oral diabetes medication:

- On the day prior to your procedure take your Morning dose of medicine as usual. **DO NOT TAKE YOUR EVENING DOSE**
- On the day of your procedure do not take your morning dose.

Afternoon Procedure

If you are Insulin dependent:

- On the day prior to your procedure take your usual dose
- On the Morning of your procedure take 1/2 of your usual morning dose

If you take Oral diabetes medication:

- On the day prior to your procedure take your usual dose
- On the day of your procedure do not take your morning dose.

Your Insulin Schedule

Insulin taken	Usual dose	Day before procedure	Day of procedure
	AM	AM	AM
	PM	PM	PM
